

SaveHosting.io – Cancellation Policy

Effective Date: October 15, 2025

SaveHosting.io, powered by Node Solutions AI LLC, provides month-to-month virtual private server (VPS) subscriptions. This policy explains how cancellations work and what happens when a subscription ends.

1. Billing and Subscription Terms

All VPS subscriptions are billed in advance for each monthly term. Payment must be received before service begins, and once activated, the subscription remains active for that full billing period.

2. Canceling a Subscription

Customers may cancel at any time. However, cancellation does not result in a refund or credit for unused days within the current billing cycle. Service will continue until the end of the paid period, after which access to your VPS and related services will be terminated.

3. Cancellation Process

To cancel your subscription, log into your **SaveHosting.io** account and follow the cancellation steps, or contact **support@nodesolutions.ai** for assistance. To avoid renewal charges, please complete the cancellation **before the next billing cycle begins**.

4. Additional Information

- If payment for an upcoming term is not received, your VPS account will be suspended and then permanently terminated.
- If you choose to return after canceling, a new subscription must be created, and prior server configurations or data may not be available.

By maintaining an active subscription, you confirm that you have read, understood, and agree to this **Cancellation Policy**.

For additional assistance or clarification, please contact our support team at **support@nodesolutions.ai**.
