

SaveHosting.io – Refund Policy

Last Modified: October 15, 2025

SaveHosting.io, operated by Node Solutions AI LLC, provides digital hosting, virtual private server (VPS), and technical support services. Because these services involve the immediate deployment of virtual infrastructure and proprietary software, all payments are final once a service is activated.

When a VPS or related service is provisioned, computing resources, storage, and licensing capacity are permanently allocated to that customer's account. For this reason, SaveHosting.io does not issue refunds, credits, or exchanges after activation. This policy applies to all hosting plans, support services, and software-related work performed by the company.

We encourage each customer to carefully evaluate their hosting and technical needs prior to purchase. Changes of preference, user error, or misunderstanding of the product features do not qualify for refund or credit.

Refunds may only be considered in rare cases where SaveHosting.io fails to deliver a purchased service exactly as described, and the failure is solely due to an internal company error. Any such claim will be reviewed by our support team, and any remedy—whether refund, service credit, or other resolution—will be issued entirely at SaveHosting.io's discretion.

By purchasing or renewing any SaveHosting.io service, you confirm that you understand and agree to this refund policy. Questions regarding eligibility or clarification of terms may be directed to support@nodesolutions.ai.
